

Stella Bucklin

Hello I am Stella and I live in area code 87123 and I strongly oppose Project Jupiter. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Not to mention the health effects it would have on the schools right next to the site, mostly full of Hispanic children. I am urging you to please reconsider the construction of AI data centers on New Mexican land. Please consider our future generations health and livelihood.
