

Angelina Malone

Why are you letting these data centers destroy our land? Our air? Our people?

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.

We don't need a data center!!! We'd be better off without it, please think of the people, the children who will be affected by the air quality. There is science telling us this is bad. Stop worrying about money and think about the people. The people need clean air, water, homes... Not a massive polluting data center that feeds us false information and only benefits the rich. Do better for us. Please.
