

Ariadne Gonzalez Dominguez

I am against this project not only of the insane amounts of water that this center would need, for the space that was taken from the animals that were living in that area, but because of the impact that this will have not only in the community but to the rest of the world. Climate change is a real thing, and it affects every single one being on this world, but apparently is not a fact to the ones in charge of all these projects. I want for future generations an opportunity to a good quality of life which includes free water, a clean air quality, and a chance to go around the world.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
