This project is dangerous for the environment, the air, the pollution in general, what you're doing is unnecessary and completely awful. People live on those lands, animal too. The mass is of water is going to ruin our water stock cause first it's not unlimited, the residents around are going to suffer the consequences of that by getting polluted waters by your abusive use of DRINKABLE. More and more people are getting away from AI, are turning to a more nature friendly methods. People are hating AI, more people are getting away from all of these pollution factories. Stop it. We do not want that on our lands. We do not want the consequences of YOUR actions on us. The heatwaves, the ecosystem dying because of what you're doing. The water you're going to us. The natural resources you're destroying with that project. The air quality permit application should be denied and approving this permit would be government-sponsored environmental racism Children live around here, the damages of this project could hurt and even kill not just them but the population! And longer and extreme heat waves will not just affect them but you too by premature deaths! New Mexico doesn't want that, the rest of the world doesn't want that. Nobody does. Stop this project for the survival of our planet and yours. If the heat grows and the ressources are gone, we're doomed. Save yourself by stopping this project, save us.
