

Erika Morales

Project Jupiter will be a grave disaster to our desert ecosystem. As New Mexicans, we pride ourselves with the beauty of this land, which includes wildlife, pollinators, cacti, brushes, clean soil, clean air, and clean water. This land is fragile, our water is scarce and precious. Data centers will rip and destroy this land of it all. We must protect our land from greed. We must shut down data centers. We must prevent them from building in New Mexico. We can stop this. We need to stop project Jupiter. NO TO DATA CENTERS IN NEW MEXICO. NO TO PROJECT JUPITER. PROTECT OUR WATER FROM DATA CENTERS. PROTECT OUR AIR FROM DATA CENTERS.
