

Gretchen Williams

I oppose project Jupiter and ask you to deny the permits requested. The project will have devastating consequences on air quality and pollution, water usage, and other environmental concerns. The change in fuel type does not help. It's the wrong project for NM. We don't want it!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
