

Suzanne DeMuth

Data centers are dangerous and largely untested, but what we DO know is that they use huge amounts of water and energy and create noise at dangerous levels to creatures human and otherwise. They are NOT a good thing, they destroy far more than anything their artificial intelligence gathering could ever create. STOP this data center from happening NOW! I travel that part of the country frequently and want it to be preserved in its natural state. In NH production of one of these centers was stopped dead in its tracks. STOP THIS ONE TOO.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
