

Ann Montoya

I live closer to Santa Theresa than down town El Paso. I urge you to hold an open public meeting about air quality. This border area will become so toxic it will be worthless. You know our air quality is very very poor at times. Dont succumb to the lure of money. This is corporate wealth v citizen health. The environment is already suffering , dont allow Jupiter to make it so much worse. This toxic air moves all over. Combine this with the gas turbines they will build in EIP for Meta.
