

Evalina Javorsky

I do not approve of the world's largest data centre Jupiter being built. Not only would this disproportionately harm indigenous people of the New Mexico Area, but it directly goes against New Mexico's Environment departments mission to protect rather than harm. These are being built everywhere under our noses and the people will not stand down to these lobbyists and CEO's trading our land and clean drinking water for the money lining their pockets. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
