

E Sandoval

Please do not provide a permit to project Jupiter. Current data shows that data centers cause environmental damage to nearby communities. The byproducts of the data center will affect the air and water quality for the small rural communities in the area.

The public should be given an extra 60 days to review the permit. This company is known to dispose of hazardous waste products which will be detrimental to the community, so the permit should be denied. If the permit is not denied, then a public meeting should be held in the local community in both English and Spanish.

Thank you
