

Tessa Chavez

New Mexico Environment Department,

As a lifelong resident of Doña Ana County, I am writing to formally request that NMED deny the air quality construction permit application submitted by Yucca Growth Infrastructure, LLC for the YGI Microgrid, also known as Project Jupiter. I strongly oppose this project due to its SEVERE air quality risks, SEVERE risk to our vital resources like electricity and clean water, and for the total lack of transparency we've been given on the truth behind this project. Our community deserves absolute transparency, independent environmental impact studies, and strict oversight, not at best, a rushed permit process for a project that fails to prioritize the local communities that will ACTUALLY be affected by this decision. I urge NMED to do your job and protect our beautiful lands and our communities by rejecting this permit and putting an end to Project Jupiter.

Thank you for your time and consideration.

Sincerely,

Tessa Chavez

Las Cruces, 88007
