

Meztlitali Bennett-Perez

I am against project Jupiter. This project will hurt our communities in New Mexico by taking our water and electricity and only giving us higher temperatures and emissions released. This project is not going forward in a proper way and needs to stop. If this project continues it shows that the lives and health of New Mexico citizens don't matter and neither does our environment.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
