

Jane Doe

I am writing to express my great concern and to oppose Project Jupiter, which will destroy the community, add excessive amounts of radiation, and destroy natural resources.

Instead of convincing people to believe this will provide "positive economic growth" (Read: your financial gain), I urge you to shut down this project. Even though you won't, because your financial gluttony is more important to you than the well-being of the land, people, and natural resources.

If you have trouble sleeping at night, it's because you're a bigot and a fucking sellout. I hope you all die a horrific death. And you will, simply by promoting this project.

Sincerely,
Jane Doe
