i am a normal, young girl, and i do not want to grow up in a future where i am in constant worry about climate change. I don't want to go through numerous climate disasters like heatwaves, droughts, storms, floods, etc, all because people are too LAZY to use their own knowledge instead of using generative artificial intelligence. This has to stop now. My children will NOT go through this. Due to climate change 1000's of innocent people will be displaced due to the rising sea levels, is this truly what you want to see?
