

Nick M

What would you be approving, exactly? Do you have iron-clad proof that Project Jupiter will not affect air quality in any significant way?

There doesn't seem to be sufficient evidence that this will not affect air quality, other than proponents of Project Jupiter just saying it won't.

That goes for the entire environmental footprint—and public health impact—of this facility.

This does not seem to be in the best interest of our state. This seems like AI companies rushing to build and "figure out the rest later."

Press pause on Project Jupiter. Wait until there's ample proof that this is a net positive for Doña Ana County and New Mexico.

Please. No potential short-term gain is worth the potential long-term cost of this. Please think about the surrounding community — and about the data center case studies you've seen up to this point. The risk is too great.
