

Riley, Tattersall

This is an unlawful oversight of environmental protections, human safety standards, and fueling an industry that does NOT work for American citizens but rather makes them suffer. Give your communities and their neighbors the mandated 60 day voting period. This is intentional harm to them, their families, and the future of where they live and the rest of their lives. Bloom Energy has a long history of proven, illegal dumping and thus will not abide by any law set for them. They should be denied the air quality permit. If it's not denied, a public hearing MUST follow for the residents in Santa Teresa in a language acceptable format so they can pursue their legal rights as tax paying Americans and vote.
