I oppose the building of Project Jupiter. It will deplete our truly precious water sources, pollute our natural resources, and sicken our people. We need to protect this state from money hungry corporations trying to take what is not theirs. New Mexico is sacred land and it must be kept that way. It is your job to protect our health and our state. Don't let the evil men of this world rape our beautiful state. There is not a single good thing about project Jupiter. Listen to your people. I VEHEMENTLY OPPOSE!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
