

Samantha Paul

Stop these permits from going through. This is completely inhumane and goes against the wishes of our people. A complete slap in the face for the beauty New Mexico once had. We already don't have enough water, what makes you think this will be better? So many people depend on their agriculture to get by, yet this is what they're met with? Even lower water levels for unnecessary data centers? You're actively destroying our lands and the work ethic of our newest generations, being made to believe AI holds a flame to true work made by the hands of our peers. Pack it up.
