

Benjamin Marquez

As a proud New Mexican, I say that Project Jupiter and Yucca Growth Infrastructure as a whole are not for New Mexico. They do not have a place in our state. If the Air Quality Bureau of NMED and NMED truly has the health of NM as their mission, they will not allow Project Jupiter to be permitted. This new plant will be harmful for New Mexicans health and breathing air. It will rob our fragile communities of water, electricity, and health. All while pumping tons of carbon dioxide (other pollutants) into our air. I ask for an additional 60 days for the public to be given in order to respond to and review this matter. The decision should be up to the New Mexicans at risk from such a dangerous project. This private gas plant will not benefit New Mexicans. This permit should be denied, I say once again this permit should be denied. Project Jupiter will poison NM for generations to come if allowed to continue. Furthermore a public hearing should be held, that is physically/virtually accessible and in English, Spanish, and ASL/Sign. The county of Doña Ana already suffers from inadequate air quality and health issues. Protect New Mexico! Protect New Mexicans! We don't need more pollution and costly poisonous projects. No to Yucca LLC and it's greed! No to Project Jupiter and it's plan to strip New Mexico of resources, vitality, and health. Protect people not corporate interests!
