

Nox Ponce

As a young person so lives in new Mexico project Jupiter is NOT gonna be this amazing thing. It will actually be the opposite it's gonna cost of water pollution , noise pollution and overall disturb are communities. We know that the people behind project Jupiter are shady people who will don't deliver on their claims. Why are we putting are communities at risk for money. New Mexico has limited water sources as it is what is the need to put that water at more risk. Knowing I will have to grow up in a state that is willing to sacrifice their own communities for a million dollar corporation is shameful, and udderly inhumane. Instead of helping the community your harming millions of life's.
