

# Ellie Coburn

Dear NMED staff,

My name is Ellie Coburn. I am a Texas resident, living in Houston, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County.

If we do not stop this project, not only will residents of New Mexico suffer, but it will be the beginning of a long period of suffering all around the United States. I am deeply concerned with this administration's decision to put the environment and the citizens in danger. I urge you to stop this project.

The project's proposed fuel cell powered grid is concerning for many reasons:

It would still produce a high level of greenhouse gas and toxic pollutants

This technology generates toxic waste, and the process for handling this waste is still unclear.

Fuel cell technology or a centralized waste system has never occurred at this scale.

Surrounding communities' air will be negatively impacted by this development.

I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.

Sincerely,

Ellie.
