

Akshaya Thirumoorthy

Dear Government, Greeting from across the world. We are sick and tired of your projects and Propaganda. We the people do not want any new data centres anymore, people have already been silently suffering from the already existing ones, causing irreversible damages to their lives. We urge you to find a better way rather than killing the planet. We can live without AI. We cannot live if we don't have a earth to live on. None of your bunkers built for billionaires are going to protect you if you don't have an earth to live on.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Stop poisoning your own people and the planet. You cannot eat money on earth. Respectfully,
Akshaya.
