The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Furthermore, the center itself should not be built. It is an UNNECESSARY project that will only cause more harm than good, especially to those in our community. There is no need for "extra funding" in our community. That funding will get used to solve problems that we KNOW will be created and/or exacerbated by the building of this project. We are furthering ourselves from supporting our community and environment, the whole reason that the NMED exists, and instead dragging them down for no legitimized reason. Money doesn't help people if they can't even breathe the air in their community. The air quality will be so negatively affected that you, the NMED, will be forcing them to choose between their health and their owned and maintained property. Project Jupiter is intending to forcibly kick these people off the land, which they have inhabited for generations. Please DENY their permit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
