

CHLOE O

Dear NMED staff, My name is Chloe.

Although I am not a New Mexico resident, I am a resident of earth, and I am writing because I am very concerned about the risks and harms Project Jupiter poses to the world globally. I am submitting this comment to strongly urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The amount of toxic pollutants, water waste, and uncertainty about the real risks of an A.I. data centre this big, holds massive implications to not only New Mexico but the entire world. In the community alone, the quality of air, water and electricity WILL be negatively impacted on a scale we have not yet seen the consequences for. I strongly urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.

Sincerely, Chloe
