

Agnes Heib

The sacrifice of our communities and environment to Ai is absurd. There is known evidence of what data centers cause, none of which benefits the people who have to live near them. Light pollution, sound pollution, air pollution, and water pollution, vital things in order to live. Stop project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
