

Vic Martinez

Hi, my name is Vic and I ask that you do not approve Project Jupiter as it is using an obscene amount of natural resources we simply do not have, Project Jupiter creates more harm than good; while i understand it crates profit for companies such as Open AI, i ask you to reconsider as it start minimizing your consumer base because people will not be able to use the services you provide in good conscience or will be to displaced or dead to do so, I ask you to think about the people that have lived in Doña Ana county, New Mexico for generations and how you would be taking their homes and entire lives, consider the children who you are robbing of futures. I hope you do what's right and not what profitable, thank you for your attention.
