

Silas Eggleton

Project Jupiter will do more harm than good for our community. Community is something we take seriously here in New Mexico, and we use our natural resources to better that community. Project Jupiter would strip many of those much needed resources away from us which will lead to further climate disruption and damage us at a personal level. This is a widely fought against project, one that I will also fight against for the betterment of the community of Albuquerque and the state of New Mexico. No to protect Jupiter.
