I am a Native New Mexican. I do not like the rhetoric and suspicious language of the company that is developing the Jupiter project. I have researched the multiple facets of the descriptions, proposals to the area and the specifics of how it began, how it is being developed and the future consequences to our state, our environment our people and our water. I believe that The Dona Ana Representatives were bamboozled. My main concern. Is the impact to water. The Company states that they will not and are not including future needs and outcomes in their Proposal. That clearly indicates to me that once the Project is in place and functional that "future needs" including but not limited to "more water needs" than originally disclosed will be a moot point leaving our state without any recourse to refuse the new water requirements. This company is framing the "advantages" of their Data Center while, at the same time, downplaying the environmental catastrophe that their presence in New Mexico will create immediately and I to the future of our State. Like all things going on in our country right now, 1) Money is "God" and can buy anything, 2) There is a Policy of Ramming the Information (almost always misleading and rhetorical) down the throats of the Decision Makers, often highlighting the "glossy parts" while "sugar coating" the not-so-great parts while at the same time, moving on a jet speed in overwhelming whirlwind speed. In New Mexico, there is a belief that whirlwinds (Dust Devils) are portents of evil. This Jupiter Project is a HUGE Dust Devil that will be sweep across our state, decimate our already tenuous water supply and leave us all in a world of hurt.
PLEASE BLOCK THIS PROJECT FOR THE FUTURE OF OUR STATE'S PEOPLE, ENVIRONMENT AND FUTURE WATER.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
