

Victoria Andrade

You're hurting our environment and making our one and only planet a harder place to live with more problems to fix or that will be unfixable in the future. You're not only affecting the communities that you're putting these things up in and destroying them, you are also destroying our wildlife and nature and destroying the planet we live on.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
