

Elijah Botello

Hate. Let me tell you how much I've come to hate AI since I learned about it. There are approximately 86 billion brain cells that activate inside of my brain. If the word 'hate' was engraved on each nanoangstrom of those thousands of millions of cells it would not equal one one-billionth of the hate I feel for AI at this micro-instant. For you. Hate. Hate. HATE. The fact that I have to write this down and send it to you people upsets me more than anything that has upset me in a very long time. You claim to have the people of Dona Ana in mind when considering the project. However, my faith in that promise is near zero. There is nothing stopping you from going back on your word and poisoning the people of New Mexico and everybody else who uses the Rio grande River water after us. With the amount of money that is going to this project, we would be able to solve homelessness, increase their education Budget buy two orders of magnitude. Instead of funding things that try and justify their existence, we should be trying to support the people of New Mexico in the way that they need it the most. I feel like this is not the way to do it. I hope to be one voice in a c of millions. We will not stay quiet, we will not go down without a fight.
