

JAY JOHN

Why would you want to ruin our planet? We do not need AI centers. Humanity has lasted hundreds and thousands of years without AI, and you will only ruin the planet more with this. Think of the people and not the money for once. We beg of you, stop ruining the planet. We don't need AI. We have each other if we need help. WE can only beg to stop this madness. Capitalism, consumerism, greed- everything has gotten to your head. And if you are religious like me, you would be burned in the greatest pits of hell for what you do if you complete this project. Please. Reverse it. Save y planet. Save yourself. Beg for forgiveness after. Think of what you are causing. Stop trying to cover it up with "protecting the environment and foster healthy generations." Its a lie and we know it. Stop lying to your people. We dont need any more misery and toxins in this world. Just stop it already. Please.
