

Franco Araceli

Project Jupiter is not safe for our community. It will cause harm not good, this data center does not need to be built. I cannot stress enough on how much harm this will cause for our environment. We need clean water, clean air, and Dear NMED staff, My name is Araceli Franco . I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. It is extremely harmful to our environment and living areas. It is not needed, this is only for the rich to profit. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.

Sincerely, Araceli
