Hello, I'm deeply concerned about this project. Project Jupiter should be stopped, there are many communities who rely on bits of water as it is, project Jupiter is going to leave them with nothing left, the body can't go without water, we are humans we need water to survive, but not only humans need water and AIR to survive, animals also need it. It doesn't matter if it's water or air, they need it to keep living, our environment is already declining very rapidly, so why should you, the rich be able to enjoy it even though you can't see how much it's regressing? I wrote to you to express my opinions on this matter as the animals and plants and PLANET cannot write to you to tell you how much they are suffering. We don't need a massive AI center, in fact we don't need AI, I beg you, reconsider this project, for the animals, plants, and PLANET.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
