

Lisa Woods

I don't support project Jupiter because the massive data centres will pollute the water and release a lot of noise that can scare off wildlife. Even though the water does eventually come back to the atmosphere, it takes an awful long time. The wind blows away the water vapour coming from the data centre which will then cause certain areas to face drought.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
