

Zachary Ramsey

I was approached by a canvasser outside of Walgreens off Lomas and Carlisle in Abq NM. The canvasser asked if I would support protecting the water rights which I agreed to. As I was leaving I noticed he was wearing a project jupiter shirt. So i think i agreed to something related to Project Jupiter. If that was the case, I strongly oppose project jupiter and dont believe a data center in New Mexico and/or surrounding states will benefit anyone aside from large corporations. We hardly have enough water as is. I support AI but data centers in areas experiencing severe droughts should not be supported.
