

Danitsha Velazquez Cotto

We want better things for our future yet , we don't realize we are sacrificing our future itself by contaminating and polluting our planet. This project could end not only the lives of every innocent animal on this earth but end mankind as a whole. We cannot sacrifice our home. We cannot let capitalism and greed overrule us. The rich don't have the final say, the billions of us on this planet do. We need to fight for our earth, we need to fight for all the innocent creatures that are dying due to global warming, pollution, contamination of habitats and more. We need to fight for our children, our spouses, our parents, our friends. Our family. Please fight against the creation of data centers, pollution, global warming, littering and general contamination of our earth. This is the only chance we get, we do not have 9 lives. I am 23 years old and recently married. I looked forward to a whole life ahead of me, I deserve to age. I deserve to watch my future children age. I deserve to fulfill my life with my husband and die by his side when we reach old age. We all deserve that. Save OUR planet. Save YOUR planet.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
