Please don't keep on contaminating our limited water supply. Building this data center will not only pollute the little water we have. But also release millions of carbon emissions yearly. This is extremely concerning and important to the United States. And surrounding countries.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
