

Olivia Council

I am a resident of Bernalillo County and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many friends and loved ones. My neighborhood has plenty of kids that, yes, can be annoying but nevertheless deserve to live in a city with breathable, harmless air. Our futures are threatened by this proposed air quality permit. Changing fuel cells won't mean a thing in the face of 10 million tons carbon dioxide pollution. 10 million??? Wild. We're already the 16th worst metro area IN THE NATION for ozone pollution. Doña Ana, the county that would be most affected, has been labeled a "nonattainment zone" for years. Allowing a company with a history of illegal hazardous waste dumping to set up in a county that is **FEDERALLY RECOGNIZED** as having poor air quality is government-sponsored discrimination. If the public outcry is ignored and the permit is granted, there needs to be a public hearing in English and Spanish held in Santa Teresa, so the people you're putting these environmental pressures on can look y'all in the face. Project Jupiter can drop as many candy-colored pamphlets on my doorsteps as they want, they go right in the recycling. They can waste paper, but they will not waste our air.
