My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. We should be able to keep our earth and communities clean, families should not be affected by the installation of these centers. There is always different solutions to world problems and needs but by building large data centers it only hurts our health for the future. Hear our voices and deny this air permit or hold a public hearing.
