

Orion Martinez

We cannot allow those who do not care for us or our land to complete this disastrous project. There are plenty live examples of the negative and harsh living conditions that those who you do not care to acknowledge, are currently suffering through. With time it will only worsen. The world we know today will soon be gone and you will have been the ones who gave power to those who prioritize profit and control over sustainability. Not only will I and those living in this state be effected by it, but so will your families. The future they are promising is not for us, but for them. We are being used. The people are being overlooked and those with power will plan to have the people dealt with and forgotten. Drought, poison, sickness, death, ignorance, violence, aggression, greed, division, and carelessness will be what this project brings. This is no future we should be sacrificing life for. Everything you have enjoyed in this lifetime, what you hope for your loved ones to experience, will be replaced by a lifeless entity. You need to do better by the people who care enough to raise concern. They should not be your enemies. The people who care are the ones that make their communities and New Mexico what it is. You are bringing nothing to the table. You are destroying it.
