

Jennifer Carrillo

Dear Members of the Review Committee:

As New Mexico continues competing for the industries of tomorrow, it is important that we welcome responsible investments that create long-term opportunities for our communities. Project Jupiter has the potential to create skilled careers, encourage additional private investment, and strengthen the economic future of Doña Ana County.

I also appreciate that the project has continued engaging with community members throughout the permitting process. I respectfully support approval of the air quality permit applications and thank you for your consideration.

Jennifer Carrillo
