

Diana Lehr

Fuel cell technology at the level needed for this size project has too many unknowns. What is known is that this use will release tons of carbon dioxide into the air as well as other toxic chemical pollutants and resulting health risks for neighboring communities. Please add 60 days to the review & comment phase! The public is already very unhappy how quickly Project Jupiter was approved by the Dona Ana County Commissioners. Please deny the air quality permission application given Bloom Energies history of regulatory issues. Please hold a public hearing in Santa Teresa.
