

## Dianne Rich

Project Jupiter would be disastrous for Dona Ana County and for New Mexico. We already struggle with both power needs and water use. This would add an already burdened system with even greater needs. Also, the company has not been totally honest either in their advertisement or in their use of people's names. People who did not agree to having their name in support of the project have found their names listed by the contractor. We can't trust what they are saying if they are willing to stretch the truth.
