

A Peterson

Please DO NOT APPROVE air quality permit #10883 FOR YUCCA Growth Infrastructure, LLC. The proposed "microgrid power generation facility" (Project Jupiter) will emit unhealthy amounts of greenhouse gases that will be harmful to the residents in the Santa Teresa, NM area.

This project has been surreptitiously fast-tracked in its construction causing New Mexicans much skepticism about its safety and the potential harm it will cause to NEW MEXICANS.

We need stronger safeguards put in place and much more oversight regarding environmental impact of this proposed data center.

I am vehemently opposed to approval of any permits for Project Jupiter data center.
