This cannot go on. The world is literally crumbling around us and this project is contributing more and more to the environmental collapse and public health. Have some humanity and respect for our planet, our people, our water. No money or power or technology will save us from all dying, including YOU. I am only 25 and lived my entire life at the whim of people who want to destroy the future of humanity, for what, a paycheck? No one deserves to live without our basic human rights. Protect this ground for the sake of your families, children, future generations, and yourself - because whatever you sew with the decision to keep this project going will be coming for you too. My asks: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
