

Chloe Dusti

I am writing to express my disdain or Project Jupiter, which I believe offers significant problems for our community.

Project Jupiter is poised to cause many problems for my county and for the local families. I think that expanding so and building these data centers isn't the worst idea, but that the location you chose is a bad choice. There's no local resources or any prior help at all to retain the water to begin with. I think your "water friendly" methods of running are lies and propaganda and that's why you push so much money into the community. Your money helps nothing if there's no resources left to live.

I urge the New Mexico Environment Department to please not approve this project.

Sincerely,
Chloe dusti
