

Taylin Hodges

I urge you to stop Project Jupiter. Fresh water is a limited resource, and clean air is something everyone needs to survive. Artificial Intelligence is not a necessity. the public should be given an additional 60 days to review and comment on the air quality permit, the application for the permit should be denied, and if the permit is not denied, a public hearing should be held in Santa Teresa in both English and Spanish with access to attend virtually. Approving this project would be government-funded environmental racism and is not something that should stand in a country that calls itself free.
