

Ed Epping

I am strongly urging NMED to stand fast and say 'no' to DOE's attempt to remove limits to the original mission. The new permit's expansion is partly due to new waste streams from plutonium pit production. This is a new project that is not part of WIPP's mission. It will overfill the repository and must not be included in WIPP. Other sites in other states must share in the responsibility of managing nuclear waste. NM has done its share!
