

## Ann White

A deal is a deal. A contract is a contract. DOE you are breaking your deal - the contract that You made with New Mexico. This DOE Permit application is dishonest and deceitful, a bait and switch. Could it be the DOE is using a piecemeal tactic over the years enlarge this dangerous undesirable project. Hoping that residents would forget and/or remain unaware of the danger that is proposed. Danger that is being snuck into their back and front yard, their Land of Enchantment. Wipp is taking advantage of our state's Human residents, the Wildlife, Livestock, Forests, Plants, Open space. They are dangerously risking all life in New Mexico. Almost all of the United States watched how DOE handled the East Palestine train derailment. We all know that there is no way to deal with deadly Plutonium being spread over our state. Keep your word and honor your contract. A deal is a deal. Take your dangerous scheme somewhere else. Leave New Mexico alone. Ann White
