

Leslie Larsen

All of us must do everything we can to stop this 50 year assault on the Earth. Putting toxic waste into the air, earth and water is insanity. Please stop WIPP expansion, for our children stop!

Please prevent WIPP expansion. NMED must strictly enforce the provisions of the Renewal Permit. Opportunities for public involvement must be frequently provided. Your commitment is needed to protect the health of our people, the safety of our homeland, and our future economic viability. Please ensure that New Mexico does not become the nation's nuclear dumping ground.

Thank you,
Leslie Larsen
